DETAILED ACTION

1. Applicant's Appeal Brief filed 2/17/2005, with respect to claims 1-23 are acknowledged. Therefore, the Final Office Action has been withdrawn. However, upon further consideration, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 15-23, drawn to a process for forming a stent of a polymer material, classified in class 264, subclass 235.
- II. Claims 13-14, drawn to a thermoplastic polymer stent, classified in class 623, subclass 1.38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be used to practice another and materially different apparatus, such as an apparatus that does not need a thermoplastic polymer stent having a hoopwise molecular orientation. For example the stent can have any shape including, but not limited to a hoopwise orientation such as polygons (i.e., squares, rectangles and diamonds). The method of invention I does not recite steps necessitating the need for annealing the expanded diameter stent to shrink its diameter to a reduced diameter, and therefore is not limited to be performed by the apparatus of invention II. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3731

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
